Senior UX Designer

Senior UX Designer with over **8+ years** of experience specializing in **UX research, design, and team mentorship**. Demonstrated proficiency in **conducting in-depth user research, including usability testing**, and leveraging insights to create intuitive, user-centric interfaces. Recognized for **mentoring junior designers**, consistently receiving **praise from leadership**, and awarded **'Best Employee' at Amazon** for contributions to the successful launch of the Amazon Food app.

- Boasts extensive experience across industries such as **banking, e-commerce, and real estate insurance**.
- Capable of **crafting seamless, meaningful digital experiences** that foster user connection and brand loyalty.
- Adept in **leading high-impact projects**, collaborating closely with development teams for precision execution.
- Proficiency in **Figma, Adobe XD, wireframing, prototyping, and creating detailed user personas**.
- Proven **leadership capabilities**, ready to transition into UX Lead or Manager roles.
- **Strong communication, collaboration, and strategic thinking** make me a valuable team player and leader.
- Commitment to **continuous growth** and **staying at the forefront of UX innovations.**

User Experience Design | UX Research | User-Centered Design | Wireframing & Prototyping | Usability Testing | User Interface Design | Responsive Design | Design Systems | Cross-Functional Collaboration | Team Mentorship | Design Consistency

EDUCATION

PG - Diploma, Design | Manipal Academy | 2018
B. Tech (EEE) | K L University | 2016

TECHNICAL SKILLS

Design Tools: Figma | Adobe XD | Sketch |
Prototyping & Collaboration Tools: UsabilityHub | Zeplin | Miro
Project Management Tools: Jira | Confluence
Productivity Tools: Microsoft Office Suite

WORK EXPERIENCE

Virtusa India — Senior Consultant –UX | Oct 2025 – Till Date

★ **Designed and optimized the Urban Mobility Back-Office (UMB) platform** for **Cubic Transportation Systems**, addressing challenges related to fragmented workflows, complex system interactions, and accessibility compliance. Led end-to-end **UX initiatives**, from **discovery and journey mapping to prototyping and validation**, enabling operators to complete critical transit management tasks more efficiently. Introduced streamlined workflows, reusable design patterns, and WCAG-compliant experiences that r**educed onboarding effort by 35%, improved task success rates by 28%**, and **decreased operational errors by 20%** across back-office users.

- Translated research insights into clear information architecture, user flows, wireframes, and interactive prototypes to support seamless navigation and task completion.
- Designed visually compelling, high-fidelity interfaces with consistent UI patterns, ensuring accessibility, responsiveness, and brand alignment.
- Collaborated closely with developers and product managers to ensure usability requirements matched functional feasibility and business priorities, enabling smooth delivery.

- Delivered high-fidelity visual design with consistent interaction patterns, strong accessibility compliance (WCAG), and responsive layouts aligned to GovTech brand guidelines.

Celanese Chemicals India — **Senior UX Designer | Mar 2025 – Sep 2025**

★ **Redesigned the Chemille B2B website** in alignment with the **Celanese Design System**, resolving outdated UI and inconsistent experience issues across regions. The redesign introduced responsive layouts, improved accessibility, and user-centric navigation for technical product data and documentation. **Integrated multilingual support** for 6 additional languages to serve a wider global audience, resulting in a **22% increase in customer retention**, a **17% increase in lead conversions**, and a **13% uplift in overall revenue from international markets.**

★ **Implemented a personalized** dashboard experience for returning B2B users, enabling quick access to frequently ordered products, saved technical documents, and RFQ (Request for Quote) history. This enhancement led to a **30% reduction in time spent per procurement session**, a **20% increase in repeat transactions,** and improved client satisfaction scores by **28%**, especially among key enterprise accounts.

- Led UX audits and heuristic evaluations to uncover friction points in the buyer journey, particularly around product discovery, technical datasheet access, and sample request flows.
- Collaborate with product managers and chemists to understand complex user needs around chemical procurement, product compliance, and documentation requirements.
- Design wireframes, high-fidelity mockups, and prototypes for data-rich interfaces, ensuring clarity in presenting specifications, SDS documents, and regulatory data.
- Maintain and evolve the Celanese Design System, ensuring consistency across all digital touchpoints, including internal portals and customer-facing platforms.

First American India — **Senior UX Designer | May 2023 – Dec 2024**

★ **Redesigned the IgniteRE web application**, addressing critical user frustrations caused by outdated UI and performance issues. Conducted UX audits, user interviews, and usability testing to identify pain points, then implemented a modernized interface with optimized iconography, consistent typography, and responsive design. Collaborated with developers to resolve system lags, resulting in a **40% increase in daily active users, a 35% improvement in user satisfaction scores, and a 25% reduction in task completion times, while reducing escalations related to UI issues by 50%.**

- Spearheaded comprehensive user research initiatives to define/address target audience needs, behaviors, and pain points.
- Designed wireframes, prototypes, and visually engaging high-fidelity interfaces for real estate industry platforms, ensuring seamless user interactions.
- Evaluated usability through iterative testing, incorporating feedback to refine and enhance design outcomes.
- Collaborated with cross-functional teams, including developers and product managers, to align user-centered designs with organizational objectives and technical feasibility.

Amazon Development Centre India — **UX Designer | Jul 2020 – Apr 2023**

★ **Redesigned the Amazon Food app** to address declining user engagement and order conversion rates by introducing innovative features and improving meal discovery. Spearheaded development of the "Shop by Recipe" feature, enabling users to select a recipe and auto-populate their cart with required ingredients, seamlessly integrated into the app's interface. Conducted user research, enhanced personalization with advanced search filters, and collaborated with developers to streamline the checkout process. The **redesign resulted in a 35% increase in ingredient bundle sales, a 25% boost in average order value, a 40% surge in app usage, and a 20% reduction in cart abandonment rates, with 90% of users praising the feature for saving time and enhancing convenience.**

- Developed user flows, wireframes, mock-ups, and prototypes to create intuitive and engaging user experiences for Amazon Advertising platforms.
- Designed and implemented A20M websites and advertising web pages in compliance with Amazon's branding standards.
- Crafted a productivity tracking prototype for Amazon employees, streamlining downtime monitoring processes.
- Optimized the functionality and usability of platforms, achieving a 15% increase in customer conversion rates through targeted UX improvements.

ICICI Bank — UX Designer | Oct 2018 – Jun 2020

★ **Redesigned the ICICI Bank iMobile app** to address declining customer engagement and conversion rates caused by confusing layouts and poorly placed CTAs. Conducted comprehensive UX research, including user personas, usability testing, and competitor analysis, to identify pain points and user expectations, and delivered an intuitive interface with streamlined navigation, strategically placed CTAs, and a visually appealing design. The revamped app led to a 15% increase in conversion rates, a 20% improvement in customer engagement, and a 30% reduction in drop-off rates, resulting in significantly enhanced user satisfaction and platform efficiency.

- Engineered a platform for ICICI Bank employees to track and manage client savings account information efficiently.
- Developed user personas and journey maps to tailor solutions that addressed user needs and business objectives.
- Created visually appealing and unique interface designs, enhancing customer engagement and retention.
- Collaborated with internal teams to execute digital/conventional marketing strategies that aligned with organizational goals.
